Election Results Data File Layout

The file is stored in **Variable length record** format. Each record is **terminated** by a hard **carriage return**. The **first 4** positions represent the **length** of the record and the **fifth** position represents the **type** of record. There are 4 types of records.
I – General Information – Appears as the first record of the file
R – Office (race) information
C – Candidate information
E – ED breakdown of candidate votes
Each Office is comprised of a set of R (one record for each office), C (one record for each candidate and party in each office) and E (one record for each ED) records.
Please Note: For propositions there will not be any C (Candidate) Records.
The various layouts are discussed below:

General Information (I) record layout

Position	Length	Item	Remarks
1 – 4	4	Record Length
